BSCH.PBC	fleri@uoguelph.ca	Yes: Dr. Roderick Barron
BSCH.ZOO	mmfergus@uoguelph.ca	No

First email sent January 14, 2015:

Good morning Chairs and Directors,

*I'm writing to inform your department/school that the School of Computer Science has proposed a change to remove the in-class offerings for CIS*1000 and CIS*1200, moving them to distance education only offerings.*

These courses haven't been offered in class in many years, and offering them online helps students to take them without scheduling/course conflict problems. As well, the School of Computer Science is unable to offer these courses in both DE and in-class version due to limited resources.

One of these courses is listed in a specialization affiliated with your department/school. Please let me know if you have any questions or concerns by the end of January.

Sincerely, Greg

--

*Greg Klotz, Ph.D.
Bachelor of Computing Program Counsellor, School of Computer Science
University of Guelph
519.824.4120 Extension 52711
Reynolds 113*

Second email sent January 28, 2015:

Good morning,

Just a quick reminder to please send me any questions or concerns by Friday. It is fine not to respond if there are no concerns.

Sincerely, Greg

Responses:

SES does not object to this.

*Cheers,
Jonathan*

*Jonathan Newman
Professor & Director
School of Environmental Sciences, University of Guelph*

We have no questions or concerns

=====
*John Cranfield
Professor & Chair
Department of Food, Agricultural & Resource Economics*

*Greg:
I have consulted with the faculty leading program committees for the majors in
the Plant Agriculture Dept.
We have no concern about the proposed change for changing CIS*1000 and
CIS*1200 to a DE only format.*

*sincerely
Peter Pauls*

*K. Peter Pauls
Professor and Chair
Department of Plant Agriculture
Ontario Agricultural College*

Thanks Greg,

*Our ADA will be sending an official message some time in the near future but just
a head's up CIS*1200 is being removed from our core. I'm not sure if any of the
majors will choose to keep it but I suspect not many will.*

Joanne Emeneau

Hi Greg — As Associate Chair in Psychology, I am responding to the email (copied below) that you sent to our Chair, Francesco Leri. I have informed our faculty advisors and others in our Department who are involved in our Psychology: Brain and Cognition BSC major about your proposed changes and they do not have any concerns or questions. Thanks for information. Rod

Thanks for the clarification Bonnie. I have no concerns with this "change". Take care, Joanne O'Meara

Greg: Hi. The Department of Human Health and Nutritional Sciences is fine with the proposed changes. Bill Bettger Undergraduate Education Curriculum Coordinator Dept. of Human Health and Nutritional Sciences

Hi Greg:

I have shared your proposal and heard nothing back. Thanks for consulting us.

*Vinay Kanetkar,
Chair, Marketing and Consumer studies.*

Greg,

Sorry for not getting back to you. As you can see below, we have no problem with these changes.

Jim Squires

No concerns, thanks Greg.
Statia
Dr. Statia Elliot
