SOCS Council Updates

File System Issues

- Staff are still following up with Oracle and there may be a “solution” in the week or so.
- Staff will be creating a load/connection bot so that we can test the system now and after the Oracle solution.
- By the end of the month we will be starting a procurement process for a new FS if Oracle cannot solve the problem.

Other Issues

- We still have A/V issues in Reynolds 1101 – this is being pursued by SOCS with PR and the contractor.
- A/V projector issues in THRN 2420 being investigated.
- Mac Lab (THRN 2420) – new images will be installed after exams (upgrade to Mohave).
 - Faculty are invited to test out their software in the lab over the Summer semester.
- THRN 3401 – managed desktops – Windows only or dual-boot (WIN, Linux). Faculty that use this lab (CIS*2030, CIS*1500) are invited to comment.

Lab Notes – Lab Access

- Reynolds

- Reynolds elevator will always allow access between basement and 1st floor

- THRN

- THRN 2420 – front & back door will **always** be locked – swipe access **only**.

Lab Notes

- Advising Hours and Offices
 - We need to designate some offices in REYN/THRN as advising offices.
 - Reynolds is open from 8:15am to 4:45pm (all floors)
 - Basement and 1st floor always available with swipe (for students taking SOCS courses)
 - 2nd floor – swipe access until 9pm for u/g students
 - 3rd floor – no access for u/g students after 4:45pm
 - Should we designate some rooms as advising offices so that we can notify TA's of this policy and post schedules?

Lab Notes – Study Space (REYN)

- Thanks to our student rep we now know that the students need **group** space.
 - They feel that individual study spaces are available elsewhere on campus
 - Therefore, we will be removing all of the dividers in REYN 0001
-
